

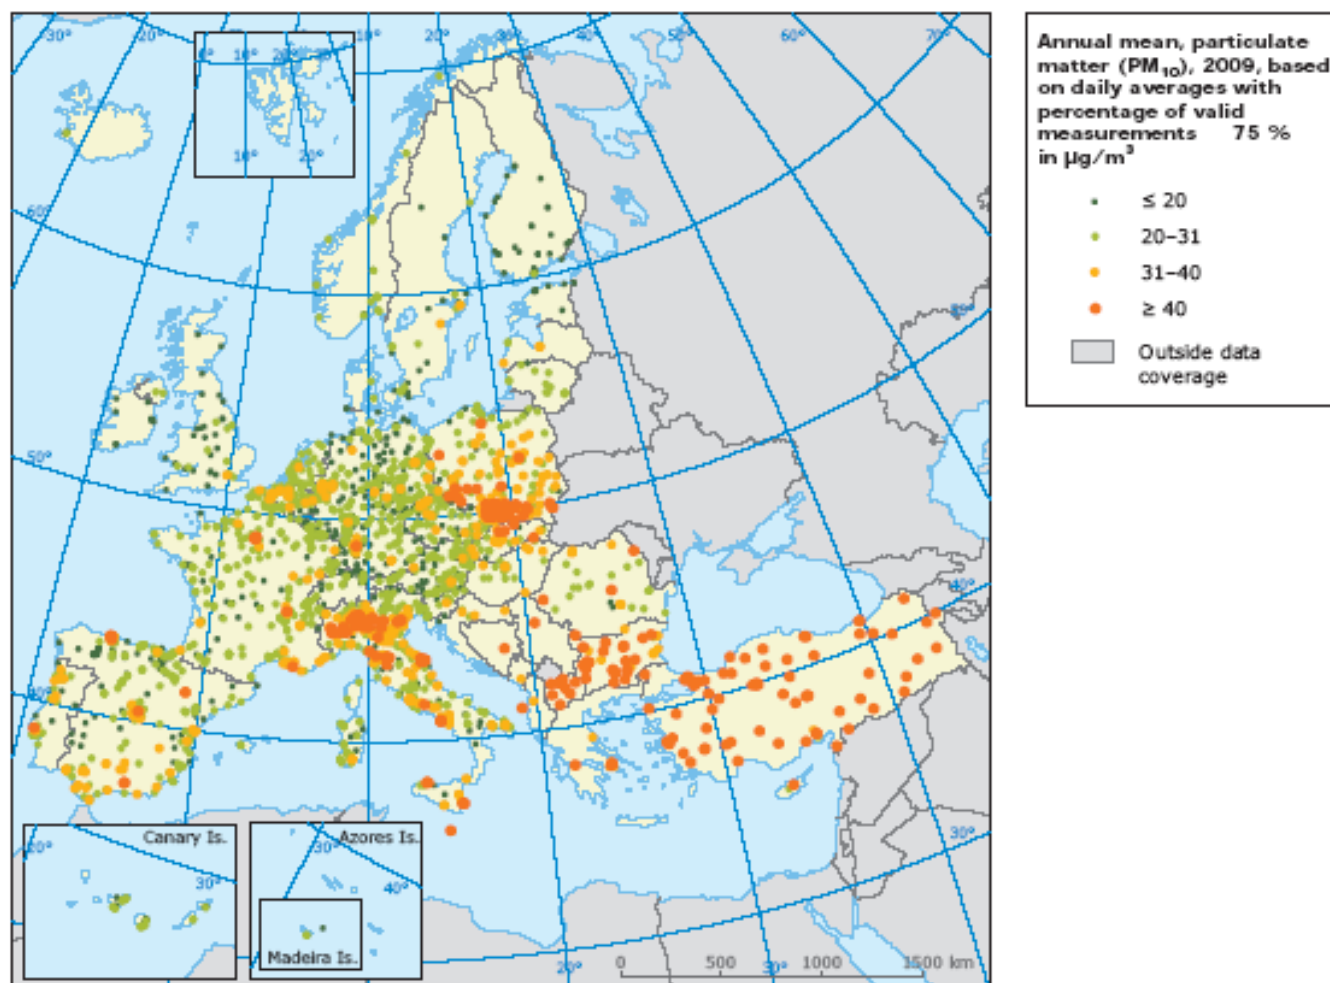

Map 2.1 Annual mean concentrations of PM₁₀ in 2009

Note: The dark orange dots indicate stations reporting exceedances of the 2005 annual limit value (40 µg/m³), as set out in the Air Quality Directive (EU, 2008c).

The light orange dots indicate stations reporting exceedances of a statistically derived level (31 µg/m³) corresponding to the 24-hour limit value.

The pale green dots indicate stations reporting exceedances of the WHO air quality guideline for PM₁₀ of less than 20 µg/m³.

The dark green dots indicate stations reporting concentrations below the WHO air quality guideline for PM₁₀.
